

FADEX® Rapid

without alcohol
without perfume
no need to rinse

Cleaning agent for professional horticulture - crop production

Liquid, ready-to-use cleaning agent for the removal of organic and inorganic dirt, plant sap, plant residues and chemical contamination

Horticulture places very specific demands on cleaning. Plant sap and chlorophyll, some of which are highly visible contaminants, and invisible chemical contaminants are particularly difficult to clean.

In order to guarantee production standards in accordance with preventive plant protection prophylaxis, which limits the occurrence and spread of dangerous diseases for the crops, it is therefore necessary to maintain constant hygiene.

For use in hygiene sluices, for surface cleaning and for the dipping of tools.

MENNO recommendation: Apply 3ml FADEX® Rapid to gloved hands and rub in.

Without water: Wipe off dissolved dirt with disposable paper.

At the hygiene gate and at the washbasin with water:

Rinse off dissolved dirt and then wipe off with disposable paper.

Cleaning agent certified for ecological agriculture:

Testing standards: EU ÖKO legislation, Demeter International, Naturland Germany, Gaa Germany, Biokreis Germany, Ecovin Germany, Betriebsmittelliste Germany or FiBL list of organic processing.
