

# MENNO® CLEAN foam cleaner

## Alkaline foam cleaning agent for agriculture, food waste processors, the animal meal industry and the food industry

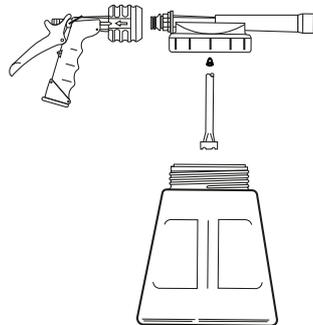

Alkaline, highly foaming cleaning agent (liquid water-miscible concentrate) for commercial use only in intensive livestock farming, food waste and carcass processing, the animal meal industry and the food industry. Cleans soiling such as excrement, grease and protein from surfaces, walls, floors, machines, equipment, vehicles, transport surfaces, containers, etc.

**Application concentration:** 1%, i.e. add 1 L of product to 99 liters of water while stirring.

**Application:** Depending on the degree of soiling, apply to the surface to be cleaned (plastic, wood, glass, concrete, metal, etc.) in the aqueous application concentration or with water up to 40 °C warm.

Wet the surface sufficiently evenly, apply as a foam and allow to soak for approx. 5 minutes without drying. Then rinse off with warm water under pressure.

**We recommend the MENNO® dosing foam syringe for application**

### The advantages at a glance

- High cleaning efficiency with economical application concentration
- Visibility of treated surfaces thanks to foam application and optimized contact times on vertical surfaces
- Minimized alkaline wax liquor input, therefore reduced waste water treatment effort
